EDUCATION

Schulich School of Business – York University

Bachelor of Business Administration

North York, Ontario, Canada

September 2024 – June 2028

- GPA: 3.3/4.0 – 7.4/9.0 | Specialization: Finance and Strategic Management
- Consulting Club VP of Finance and Co-President of Mock Trial Club

WORK & LEADERSHIP EXPERIENCE

Endeavour Consulting

Incoming Management Consultant – Client: The Food Bank of York Region

Toronto, Ontario (Hybrid)

Fall Term

Team CarePal

Product & GTM Strategy Analyst

Edmonton, Alberta (Remote)

April 2026 – September 2026

- Owned product direction for Zolo, a caregiver-facing AI assistant, building a personalization framework keyed to user query, geography, and Caregiver Burnout Inventory score, validated across 100+ test scenarios
- Scaled coverage from one province to all 10 by designing a repeatable data extraction and categorization method, ingesting 25,700+ caregiver resources
- Cut mishandled inquiries by designing the AI-to-human escalation framework (trigger criteria, handoff logic, resolution ownership), delivered as engineering-ready requirements
- Built the company's first structured customer service question library, classifying 150+ inquiries across 10 categories mapped to platform sections and response types
- Shaped the engineering roadmap by scoping LLM automation opportunities and auditing post-rebuild coverage gaps, converting both into prioritized requirements adopted into development

Geode Labs

Product Strategy Analyst

Edmonton, Alberta (Remote)

July 2026 – June 2026

- Ran a gap analysis of the pre-launch Yu AI platform, surfacing 35 findings ranked P0–P3 by launch risk
- Pressure-tested 4 flows and 14 user routes against real usage to call what to enhance, defer, or cut
- Turned product gaps into engineering-ready requirements with expected-vs-actual behaviour and fixes
- Drove defect triage to root-cause 7 launch-blocking issues across backend and client-side
- Standardized 3 conflicting taxonomies and 9 navigation patterns to align frontend with backend

Royal Canadian Legion

Business Process Analyst (Digital Transformation)

Aurora, Ontario (Hybrid)

May 2026 – August 2026

- Supported the Treasurer with audit work and budget management, reviewing financial records and documenting procedures to strengthen financial oversight and reporting consistency
- Managed budgets and set facility rental prices, balancing operating costs and revenue objectives to support financial planning and day-to-day decisions
- Developed Excel tracking systems to replace manual record-keeping and standardized administrative workflows, improving the organization and accessibility of financial and operational information

PROJECTS

Cari – AI Customer Support Bot for Team CarePal

Built an AI-powered customer support chatbot for the Team CarePal platform to handle caregiver and user inquiries, using conversational AI, web deployment, and UI/UX design.

Internal Support Bot for the Royal Canadian Legion

Built an internal AI chatbot for Royal Canadian Legion staff as part of a tech transformation initiative, centralizing answers on membership, benefits, and branch processes using conversational AI and knowledge-base design.

Multi-Agent AI Trading Desk

Developed a multi-agent AI trading desk that coordinates specialized agents for market research, analysis, and trade decision-making, using multi-agent AI orchestration and a web-based interface.
